

**DEPARTMENT OF SCIENCE & TECHNOLOGY  
CHANDIGARH ADMINISTRATION**

**Guideline of formulation of Research Proposal for the Development of Science & Technology Activities in UT Chandigarh.**

1. The proposal may be relevant to the area of UT Chandigarh.
2. The proposal may not override the objectives contained in the proposals already sanctioned by the Chandigarh Administration.
3. The proposal should be feasible to be concluded once for all.
4. Only provisions for that equipment should be demanded which is of utmost necessity for the research project and which is not available in the institution concerned.
5. The proposal may be of short duration i.e. for one year only.
6. A new proposal from the Principal Investigator who has already in hand a project approved from the Chandigarh Administration, Department of Science & Technology, will not be considered.
7. Each scheme will have a minimum of one Co-investigator, in addition to the Principal/ Chief Investigator.
8. No provision for staff like social workers, field workers, lab attendant etc. will be considered.
9. Any Principal Investigator, who has earlier worked in a Research Project, funded by this Department as Principal Investigator/ Co-Investigator, and the Accounts of the Projects are not settled, will not be considered.

***The research schemes based on the following points will be preferred:***

- i) Communicable diseases as related to UT Chandigarh viz. Water Borne Diseases and their management.
- ii) Epidemiology of Non-Communicable Diseases and Methods of their Control.
- iii) Water Proofing of buildings, Rain Water Harvesting.

- iv) Pollution Measurements and Prevention.
- v) Traffic Control and Parking Management.
- vi.) Cheap building Materials.
- vii.) Processing and Preservation of Food/ fruits.
- viii.) Horticultural Development.
- ix.) Alternate Sources of Energy and Energy Conservation.
- x.) Biotechnology - Medical & Health.
